

What is a Neuropsychological Assessment?

A neuropsychological assessment is like a fun adventure where you get to do different activities, like solving puzzles, answering questions, finding cool facts, and even doing some drawings. All these activities help us understand how your amazing brain works. And guess what? It's not at all like getting a shot with a needle or anything painful. It's more like playing awesome games and having interesting chats. Plus, it will help your parents and teachers understand how to support you best!

Until then, do not hesitate to ask us questions 😊

On the day of the assessment, your child

- Must have a complete meal
- Take their medication
- Wear their glasses
- Wear their hearing aids
- Bring some snacks and liquids
- Bring your child's report cards and past reports!

- You can park on the right side of the building in spot **205** for free!

Code for the door

Dr. Bénédicte Blain #2052

Dr. Maude Lambert #2055

Dr. Nicolás F. Narvaez Linares #2053

Mme Laila Kokenberg-Gallant #2054

Reschedule your appointment if:

- If your child is sick (e.g., flu).
- If your child did not have a good night of sleep and is tired.
- If your teen drank alcohol or used drugs (e.g., marijuana) in the last 48 hours.
